Vital Statistics:

Every day 2000 children are reported missing and thousands of the elderly wander off. The key to recovering these children/elders is quick action by parents/guardians and law enforcement.

Why the EZ Child/ Elderly ID System?

That is why we are pleased to offer you the nation's most comprehensive digital fingerprinting child/ elderly identification system. **EZ Child /Elderly ID** has worked directly with police agencies around the country in developing our software. We have worked with law enforcement officials to ensure that our digital fingerprinting system is up to their standards. We have taken it one step further and included a **digital fingerprint analysis software** package to make sure all the necessary **"points"** on a fingerprint are obtained. We ensure that we capture all the vital information required by the Amber Alert system. Our **EZ Child ID/Elderly** form includes all 10 fingerprints and is saved in the universal PDF format. The parent/guardian receives **EZ Child/Elderly ID** CD or thumb drive with all the information on it. This allows the parent/guardian the opportunity to reprint the **EZ Child ID/Elderly** form at home if they desire. To help protect from identity theft, our software was written so that no information from the child/elder is saved on the computer. Once you start over, all of the data is permanently erased. The parent/guardian is the only person who retains the child's/elder's information.

Why go to this extent?

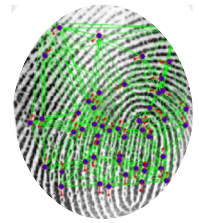

All of this technology aids in the reporting time if a child is abducted or and elder is missing. The parent/guardian can take the CD to a police department to be downloaded, or they could even email the form to them. There is no other system in the country that is as comprehensive as the **EZ Child ID/Elderly System**. To make it even better, the system comes completely assembled and can be **set up in under 30 seconds!**

Easy to Use:

Our **EZ Child/Elderly ID** System was developed from the ground up with **"Technology Made Simple"** as our motto. We designed our software, so that with only 5 minutes of training anyone can use it. We have a quality data check list which verifies that you have completed each step correctly. There is also an easy to use step by step instruction booklet included with every machine. Because we wrote the software for actual child/elderly id events, we have also included helpful tips to ensure your success.
